

# The Nanomechanics in Italy

## 2007

Editor  
**Nicola Maria Pugno**  
Department of Structural Engineering  
Politecnico di Torino  
Corso Duca degli Abruzzi 24  
10129 Torino  
Italy

---

# Contents

<b>Chapter 1</b> Mimicking lotus leaves for designing super-hydrophobic/hydrophilic and super-attractive/repulsive nanostructured hierarchical surfaces <i>Nicola M. Pugno</i>	1
<b>Chapter 2</b> Nanomechanics of hierarchical biomaterials <i>Nicola M. Pugno and Alberto Carpinteri</i>	11
<b>Chapter 3</b> Carbon nanotubes and carbon nanotube reinforced nanocomposites <i>Antonio Pantano</i>	23
<b>Chapter 4</b> Poly(dimethylsiloxane) colloidal AFM probes: A new tool for mesoscale contact mechanics investigations <i>Renato Buzio and Ugo Valbusa</i>	57
<b>Chapter 5</b> Atomistic approach to nanomechanics: Concepts, methods, and (some) applications <i>Pierluca Palla, Mariella Ippolito, Stefano Giordano Alessandro Mattoni and Luciano Colombo</i>	75
<b>Chapter 6</b> Multiscale modelling in biomechanical applications <i>Alberto Redaelli, Monica Soncini, Simone Vesentini, Emiliano Votta Marco A. Deriu, Alfonso Gautier, Gianfranco B. Fiore Franco M. Montevecchi, Søren Enemark, Iuliana Aprodu and Mariana Ionita</i>	109

<b>Chapter 7</b>	
Conus Mediterraneus conch anisotropic structure and its effect on nanomechanical properties	125
<i>Cristina Bignardi and Nicola M. Pugno</i>	
<b>Chapter 8</b>	
Development of nanostructured materials for reinforced carbon fiber by means of CVD methods	137
<i>Mario Marchetti, Stefano Bellucci, Marco Regi, Roberto Pastore, Plinio Coluzzi, Sandro Mileti, Fabio Mazza and Luca Trefiletti</i>	
<b>Chapter 9</b>	
Carbon nanostructures and hard coatings: Characterization by inelastic light scattering	169
<i>Marco G. Beghi and Carlo E. Bottani</i>	
<b>Chapter 10</b>	
Properties of nanocomposites based on resin and carbon nanotubes	197
<i>Stefano Bellucci, Federico Micciulla and Nicola M. Pugno</i>
